Stepping up during Hurricane Dorian

We hope everyone stayed safe during the storm! Two Angelwood group homes are in evacuation zones therefore we moved residents to different locations to ensure their safety during Hurricane Dorian. Thank you to our amazing staff for stepping up during this tough time. Kenya Daniels, Career Development and Education Center Director, stated, "Everyone pulled together as a team that was really more like a family. The staff ensured that the residents were safe and comfortable and made the evacuation more like a slumber party with fun activities."

We also received funding for a new group home generator from the Rotary Club of Jacksonville. This generator has and will provide power and peace of mind for years to come. Thank you!
